

Hello Everyone,

Welcome to the **winter asynchronous distance education class!**

Below are the key items you must review before starting the weekly materials and assessments:

Explore the course website

I created for this class: <https://pengdsci.github.io/MAT121Winter/>. You can also access this link from the course entrance page on D2L.

Top navigation panel: Includes links to essential resources:

- Syllabus – *read the syllabus to know my expectations and your obligations*
- Learning Strategies – *help you effectively grasp the timely learning materials*
- Office Hours – *Zoom office hours (no appointment is required starting week 2)*
- Zoom Link - *for office hours*
- ISLA (Interactive Statistics Learning Applications) – *enhance your understanding of topics*
- Flowcharts – *provide a big view of confidence intervals and hypothesis testing.*
- Statistical Tables – *normal and t-tables will be used in this class*
- Contact Information – *email is the best way to catch me*

Right navigation panel (labeled "Table of Contents"): Contains links to:

- Weekly modules – *each module's topics and learning resources*
- Weekly assessment details (exams) – *weekly exam information*
- Final exam – *final exam information*

Review the course logistics and information carefully. The link is available on the first module's webpage, or you can use this direct link:

<https://pengdsci.github.io/MAT121Winter/notes/w01-CourseInfoLogistics.html>

Read the note on using ISLA apps. The link is on Module 1's webpage, or access it directly here: <https://pengdsci.github.io/MAT121Winter/notes/w01-CourseInfoLogistics.html>

Before beginning each module (3 modules per week, except last week):

- Review the module's topic list and related informational items.
- Complete the **online practice exercises**.

Note: These informational items **will be included in the first weekly exam**.

Zoom Office Hours

Regular Office Hours: According to the syllabus, I hold Zoom office hours every Wednesday and Thursday from 1:00 PM to 3:00 PM. No appointment is needed for office hours. It's first come, first served. Feel free to join me while I work with your classmates.

Week One Office Hours: I will hold office hours today (Monday) and Friday, from 1:00 PM to 3:00 PM. Please feel free to attend if you have questions about the class. The Zoom link is available on the course webpage under the Contact tab in the top navigation panel.

Instructor's Advice:

- The most effective way to succeed in this course is to **read and practice consistently** until you fully grasp the concepts and procedures.
- Use ISLA apps **whenever possible** to reinforce your learning.
- **Don't hesitate to reach out** if you need help - I'm here to support you.
- **Remember:** This is **not** a mathematics class - it's a statistics class. The only math skills required are **addition, subtraction, multiplication, division, and square roots**. Anyone can master statistics with persistence and practice - **just don't give up!**

Let's work together to achieve your learning goals!

Thank you,

Dr. Peng
